Central Auditory Processing & Paediatric Hearing Services

Combining UQ’s excellence in teaching and research with the latest technology

Our paediatric services include:

- Comprehensive Hearing Assessments for infants through to school aged children
- Central Auditory Processing Assessments for children aged seven years and above
- FM fittings
- Swimming earplugs and Musician plugs to protect your child’s ears
- Educational programs
- School Hearing Screening services.

Costs:
The Clinic provides audiological services at very reasonable service costs for clients.

No referral is required unless accessing specialised Medicare programs.

Private health insurance rebates may be available on selected hearing services and FM system purchases.
