Speech pathology services

Our qualified, experienced Speech Pathology Clinical Educators and our students provide speech therapy services for adults and children in a friendly, relaxed environment. We specialise in the assessment, diagnosis and treatment of a variety of communication issues, such as:

- Delayed speech development
- Delayed language development
- Reading and spelling difficulties
- Stuttering
- Voice disorders
- Communication difficulties associated with stroke, head injury and Parkinson’s disease
- Swallowing difficulties
- Interprofessional clinics with occupational therapy, audiology and physiotherapy.

Fast facts

Speech Pathologists play an important role in our society. In Australia alone,

- One in seven people have some form of communication disability
- 386,000 children have speech delay
- 577,000 school-aged children have difficulties with language
- 326,000 people stutter
- 2.5 million people have hearing impairment
- 22,000 people are affected by a severe brain injury each year.
